WORK EXPERIENCE

Senior Software Engineer I

Bazaar Technologies [26/04/2022 – Current]

City: Karachi

Country: Pakistan

Software Engineer

Folio3 [02/12/2020 – 22/04/2022]

City: Karachi

Country: Pakistan

- Currently working on a project which enables employees and trusted business partners to access company documents in a secure, controlled environment. By centralizing, securing, and tracking document management systems and delivery, It helps streamline business processes, improve customer service, and reduce operational costs.
- I have also worked on a project which captures data of contract/proposal/SLA using web-based forms. This system also captures data of invoices using web-based forms. In addition to manual invoice data entry, this system is also capable of accepting and converting one pre-defined format invoice automatically and save its data into the system.
- Worked on a Trust platform that enables highly secure, private, and auditable cyber-transactions. A smart-phone based app provides a frictionless and uniform user experience to interact with any enterprise service or device without typing any credentials. Robust, authenticated logins, physical entry access, digital signatures, payments, and IoT connectivity are now a breeze.

MERN Stack Developer

Cloud Coherence [15/05/2020 – 30/11/2020]

City: Karachi

- I have been working on AWS Technologies here such as API Gateway, Lambda, Cognito, S3, SNS, SQS, DynamoDb.
- Reactjs with Ant Design on Frontend.
- Involved in the development of Recruitment/Assessment Portal on a solo basis.

Associate Software Engineer

VentureDive [15/10/2018 – 30/04/2020]

City: Karachi

- Contributed to internal Resource Managing App which includes managing employee directories, allocations, manager and their reporters, Projects deadlines and resource alignments, and attendance as well.
- Also worked on a private jet booking application on which customer can book private jets directly from the app with all the information needed on the hand.

Full Stack Developer

ProgStream [15/09/2017 – 15/08/2018]

City: Karachi

Country: Pakistan

- Worked on various projects using Angular2 and 4, Nodejs, Reactjs, Ionic Framework, TypeScript, jQuery, Web Sockets PostgreSQL, MySQL, AWS code pipeline, Teamcity.
- Delivered a project on a solo basis.
- Fixed bugs on the daily basis for ongoing projects and proposed better solutions to the clients.
